Procedure 12.235, Operating a Vehicle Under the Influence (OVI): Processing & Arrest, has been revised. The Cincinnati Health Department no longer conducts urinalysis testing for OVI cases. Consequently, only one urine sample container, three quarters full, is required to be collected for analysis.

In addition, officers must query **both traffic and criminal histories** in the Regional Crime Information Center (RCIC), Law Enforcement Automated Data Systems (LEADS) and Electronic Countywide Law Enforcement Applied Regionally (eCLEAR) in order to accurately determine past OVI convictions. [Attached](#) to these Staff Notes is information on obtaining complete queries for prior DUI/OVI convictions.

Manual of Rules and Regulations, 3.01A and B

Purpose:

To ensure all members of the Department are properly equipped, informed, and uniformly trained to perform their assigned duties.

Policy:

Uniformed sworn personnel will report for duty in a clean and pressed uniform with the proper attire and equipment. Personnel will present a professional image at all times. Non-uniformed sworn personnel will report for duty in accordance with their bureau/section/unit's standard operating procedure (SOP).

Information:

Slight procedural differences may be necessary in certain units; however the conduction of roll call and personnel inspection is to be performed uniformly throughout the Department. Any variations in equipment or uniform parts may lead to confusion by the public and detract from an impressive, professional appearance.

Procedure:

A. Roll Call and Personnel Inspection

1. All uniformed units will conduct daily roll call and personnel inspection in the following manner. The inspecting supervisor will follow the commands in the order listed.
 - a. "Fall In"
 - 1) Two or more ranks may be used, depending on the number of officers. Ranks should be four feet apart when possible.

 - 2) When the inspecting supervisor gives the command to raise pistols, the officer will:
 - a) Draw the pistol from the holster.
 - b) Raise the pistol with the muzzle straight up to the inspecting supervisor's eye level.
 - c) As the inspecting supervisor approaches the officer's right, the officer will rotate the pistol, enabling the inspecting supervisor to view the chambered round through the weapon's ejection port.
 - 1] The supervisor will ensure the weapon is loaded.
 - 3) After inspection, the officer will lower his pistol and return it to the holster.
- f. "Replace Magazines"
 - 1) The officer will then reinsert the magazine into the holstered pistol.
- g. "Raise TASERS"
 - 1) When the inspecting supervisor gives the command to raise TASERS, the officer will:
 - a) Draw the X26 TASER from the holster.
- h. "Remove Cartridges"
 - a) The officer will remove both cartridges from the X26 TASER and hold them away from their TASER.
 - b) The inspecting supervisor will move down the line, physically take the X26 TASER from each officer and perform a "spark test" for one second.
 - 1] The supervisor will check the battery life percentage on the Central Information Display (CID).
 - 2] If the percentage is less than 20%, the supervisor will have the Digital Power Magazine (DPM) battery replaced.

- 3] The supervisor will check for a rapid/visible spark between the electrodes.
- 2) After inspection, the officer will replace both cartridges, re-holster and secure their X26 TASER.
- 3) If an unintentional discharge occurs during a spark test, or any other time, an immediate investigation must be conducted by the district/section/unit commander or their designee. The designee must be a supervisor of equal or higher rank than the member who had the unintentional discharge. A Form 17 will be forwarded to the Police Chief detailing a full account of the incident.
 - a) The deployed cartridge will be disposed of unless otherwise directed by the district/section/unit commander.
 - b) All documentation related to the incident will be retained at the district/section/unit of occurrence.
- i. A supervisor calls the roll from this position. When an officer's name is called, the officer will answer "Here Sir or Ma'am" and remain standing at attention.
- j. "Fall Out"
 - 1) At this time officers may be seated for the reading of roll call announcements.
2. All non-uniform units will conduct supervisory inspections of personnel at the beginning of each tour of duty, according to their bureau's S.O.P. Supervisors will ensure all non-uniform personnel have all the required equipment.
3. Roll Call will be conducted daily.
 - a. Items supervisors are to present to personnel at roll call are:

 - 2) Allow the slide to go forward and point the firearm into the clearing trap. Pull the trigger to check the functionality of the firearm.
 - 3) After a successful trigger check, the supervisor will pull the slide back to engage the trigger again and insert a color-coded bullet blocker into the barrel of the gun. The bullet blocker will either display "red", indicating the firearm has an obstruction in the barrel, or "green", indicating the firearm is unloaded.
 - a) If the bullet blocker displays red, the supervisor will take necessary action to locate the obstruction in the firearm. If unable to determine the problem, the firearm must be taken to the Target Range for examination by an armorer.
 - 4) If the bullet blocker displays green, point the unloaded firearm with the bullet blocker towards the ceiling and depress the trigger. The bullet blocker should be propelled a short distance into the air, indicating the firearm's striker is functioning properly.
 - 5) Remove the magazine and hand the firearm back to the officer. After holstering the firearm, the officer will retrieve the round from the floor and return to the roll call line.

Definitions:

Physical control is defined as being in the driver's position in the front seat and having possession of the vehicle ignition key or ignition device.

Purpose:

To provide a safe environment for all motorists and pedestrians on area roadways.

Policy:

The Cincinnati Police Department (CPD) will aggressively engage in OVI enforcement. Officers will properly preserve and prepare evidence for all OVI court cases. The Police Department will work with the community to help develop and participate in preventative programs relating to OVI enforcement. Each police district has a testing site.

District Commanders must designate a supervisor with a valid breath testing permit responsible for the care and security of the testing site. Traffic Unit is responsible for the care, maintenance, and instrument checks of the breath testing instrument.

Information:

An officer making an arrest for OVI must establish reasonable grounds for the initial stop. An officer observing an operator commit a traffic violation or any reasonable investigation are examples of a basis for a stop. The officer must then establish probable cause to arrest for OVI before administering any Blood Alcohol Concentration (BAC) Test. Administer Standardized Field Sobriety Testing at roadside prior to arrest when possible.

Procedure:**A. Breath Testing for Blood Alcohol Concentration (BAC)**

1. Officers making an OVI arrest who are not certified breath testing instrument operators will request one respond to the arresting officer's district.
 - a. If time is of the essence, officers will use the nearest testing site.
 - b. Read the arrested the Miranda Warning and advise of the right to make a telephone call at the time of arrest. Document this information on the Form 495, Cincinnati Police Department Intoxication Report, in the Arrest Information section.
2. Officers must obtain a breath, urine, or blood test within three hours of the violation (i.e. last operation of a vehicle). There is no time limit when a chemical test is not taken under ORC Section 4511.19(A)(1)(a).
3. The order of testing for Blood Alcohol Concentration (BAC) is:
 - a. Breath
 - b. Urine
 - c. Blood
 - 1) If arrested is being treated for injuries at a hospital, blood is the preferred test.
4. The arresting officer or the breath testing instrument operator must observe the subject for 20 minutes or more before administering the breath test to ensure nothing is ingested orally.
5. The breath testing instrument operator will:
 - a. Ensure the breath testing instrument is functioning properly and the testing site log book is in proper order.
 - 1) An internal radio frequency interference (RFI) detector protects the breath testing instrument from radio interference. Radio interference inside the testing site may set off the RFI detector.
 - 2) If the RFI detector activates during a breath test, the operator will start the testing process over from the beginning. This does not excuse the arrested from the responsibility of giving an additional breath sample.

- a) Do not attempt a third test on the breath testing instrument if the RFI detector activates a second time.
 - 1] Time permitting, transport the arrested to another testing site.
 - 2] If time is a factor, the arresting officer will request a urine sample.
 - b. An operator encountering a problem which creates doubt as to the breath testing instrument's accuracy or renders the breath testing instrument inoperable will remove the breath testing instrument from service.
 - 1) The breath testing instrument operator will make a blotter entry noting the reason for removing the breath testing instrument from service and notify the shift Officer In Charge (OIC).
 - 2) The shift OIC will notify the Traffic Unit as soon as possible, but no later than the Traffic Unit's next working day.
 - c. The breath testing instrument operator will conduct all testing and processing according to the Ohio Administrative Code Sections 3701.53.01-10 and Ohio Revised Code (ORC) Sections 4511.19 and 4511.191.

OBTAINING COMPLETE QUERIES FOR PRIOR DUI/OVI CONVICTIONS

Driving Under the Influence (DUI) and Operating a Vehicle Under the Influence (OVI) convictions are now being entered into the Countywide Law Enforcement Applied Regionally (CLEAR) database in the “criminal history” record.

Due to the manner in which various agencies have entered traffic citations into CLEAR in the past, DUI/OVI charges may be listed as Criminal History or as Traffic History when sorted by eCLEAR and Mobile Data Computer (MDC) Copsmart applications. The Regional Crime Information Center (RCIC) has been working with Clerk of Courts’ personnel and law enforcement agencies to simplify the process.

Officers should not use eCLEAR or MDC traffic and criminal history responses as the sole basis for determining past convictions for DUI/OVI or other offenses. Only Hamilton County offenses are reflected in these records.

Officers should query the driver's history in the Ohio Bureau of Motor Vehicles (BMV) records, issuing state of license and/or state of residence. In addition, any state in which an officer suspects the driver may have history should also be queried. The RCIC history records provide additional data on local charges and are complimentary to, but not a replacement for, the BMV record review.

The “Person” forms on the MDC and eCLEAR can be used to query an operator's status and Ohio BMV history. More than one query may need to be run to obtain operator's status responses and records from other states. It is important to know, even when properly submitted, eCLEAR forms may not return full history records from states other than Ohio.

There is a National Law Enforcement Telecommunications System (NLETS) transaction (KQ) which is used to obtain operator's license history. The transaction can be submitted using the LEADS Direct forms on the MDC and eCLEAR. Instructions for the KQ transactions and many other direct transactions are available on the MDC Reference Guide on the RCIC Website under Training Documents: Bulletins.

Captain Michael John
District One Commander
310 Ezzard Charles Drive
Cincinnati Ohio 45214

Captain John:

Please extend my personal thanks and commendation to:

Police Officer Rebecca Napier

On January 28, 2015, at 1856 hours, two males used their car to ram another car at 114 W. 14th Street. This was a ruse; when the two male occupants of the second car got out to exchange information, the suspects began punching them and took their property.

One of the victims provided a license plate of the suspects' car. Using computer resources, District One Violent Crimes Squad Investigator Rebecca Napier was able to identify Kelley Williams as being associated with the car. Officer Napier completed a photo lineup which another officer showed to the victims. They positively identified Mr. Williams as the driver and one of the robbers.

Officer Napier then began investigating Mr. Williams' known associates identifying Alex Ford. Officer Napier has dealt with both suspects in the past and believed Alex Ford to be the second suspect. Using GPS, officers located the victim's cell phone in the block of Pleasant Street where Mr. Ford resides, Officer Napier completed a photo lineup containing Mr. Ford's photo. He too was then positively identified as the second suspect. Warrants were signed on both suspects for two counts of robbery.

Officer Napier's abilities and actions resulted in the identification of two dangerous felons who have targeted Over the Rhine for criminal activity.

Officer Napier is a credit to District One and the Department.

Sincerely,

Lieutenant Colonel James L. Whalen
Patrol Bureau Commander
